2. The percentage increase in remuneration of each Director, Company Secretary & Chief Financial Officer in the financial Year ended 31st March, 2015 was as under :

Sr. No.	Director	% Increase
1	Sh. J K Garg, Chairman & Managing Director	118%

4. The number of permanent employees on the rolls of the company as on 31 March, 2015 was 149.
5. The explanation on the relationship between average increase in remuneration and company performance is as follows :

A comparative table of Company's performance during the financial year 2014-15 vis a vis immediately preceding financial year is given below :

	2014-2015	2013-2014
Total Income (₹ in Lakhs)	9516.19	8801.43
EBIDTA (₹ in Lakhs)	934.26	838.04

6. Comparison of the remuneration of the Key Managerial Personnel against the performance of the company.
- Over the years there has been manifold increase in the responsibilities shouldered by the Key Managerial Personnel, whether due to product innovations, increased turnover or change in law. Also there was no balance between fixed and incentive pay (there being no incentive pay) and the remuneration being paid to these KMPs was not sufficient to motivate them. To align the earlier remuneration of KMPs with the remuneration policy framed by NRC, their remuneration was re-fixed as a one-time measure. The average increase of 94% in remuneration of key managerial personnel against increase in PBT mentioned above is based on qualifications, industry experience, individual performances, company's performance and prevailing remuneration in industry in order to motivate them for better future performance to achieve organization's growth expectations.
7. Variations in the market capitalization of the company as at the closing date of the current financial year and the previous financial year was as under :

9. Percentage increase over in the market quotations of the shares of the company in comparison to the rate at which the company came out with the last public offer was 120 % as on 31.03.2015.

10. Average percentile increase already made in the salaries of employees other than the managerial personnel in the last financial year and its comparison with the percentile increase in the managerial remuneration and justification thereof and point out if there are any exceptional circumstances for increase in the managerial remuneration.

As stated in para 6 above.

11. Comparison of the each remuneration of the Key Managerial Personnel against the performance of the company.
There has been 43% increase in the PBT of the Company against percentage increase in remuneration of KMPs as mentioned at sr. no. 5 above. The remuneration of KMPs has been increased to align their earlier remuneration with the remuneration policy framed by NRC as a one-time measure.
12. The key parameter for any variable component of remuneration availed by the directors : The only key factor is the profit earned by the Company.

INDUSTRY STRUCTURE AND DEVELOPMENT

Synthetic Leather Industry in India is badly fragmented & somewhat concentrated in Northern India & Western India. Most of the units are in small scale and unorganized sector manufacturing cheap quality products for small & unorganized sector. The Industry has not been able to achieve its full potential due to tough competition from imported material from China, Taiwan, Hong Kong & Korea, where there are very large units enjoying benefits of economies of scale.

However, the company has been able to withstand competition from both domestic and abroad, as it is an integrated player with in-house manufacturing facility for PU Resin, which is the main raw material for PU coated Fabrics. Further, the company is continuously upgrading its technology and modernizing plant & machinery to maintain competitive edge in the market and hence despite tough competition in the market, its sales are growing every year. The company is now concentrating on PU Synthetic Leather where competition is somewhat less.

OPPORTUNITIES AND THREATS

Development of new types of high quality PU resins and coated fabrics, particularly breathable ones, presents fresh opportunities, because there is less competition in these fields. Obsolescence of technology of coated fabrics and cheaper imports of coated fabrics poses a threat. In the industrial gauges segment, every upward trend in economy presents opportunities to sell the gauges, these being in the nature of capital goods.

SEGMENT-WISE PERFORMANCE

During the year under Report, the segment-wise performance of the Company had been as follows :

A. COATED FABRICS/PU RESIN

Key performance parameters of Synthetic Leather Segment are as under:-

		(₹ lakhs)
Production lakh meter	2014-15	2013-14
	36.24	32.84
Segment Revenue	8408.43	7170.26
Segment Profits/(Loss) before interest & other		
common unallocable expenditure	351.75	165.68
Segment Assets	5986.40	5353.60

B. ELECTRONIC GAUGES

Electronic Gauging Systems has been developed by in-house research & development. This division's performance has been satisfactory as may be evident from the following results. (Unless stated otherwise, the figures are in ₹ lakhs)

	2014-15	2013-14
Production (in Nos.) (Gauges + Parts)	63+532	87+392
Segment Revenue	2207.89	2614.89
Segment Profits before interest & other common	336.13	404.59
Un-allocable expenditure		
Segment Assets	922.92	946.79

The performance of Electronic Gauges Division depends upon investment in users industries and may get adversely affected whenever there is slowdown in domestic and international economies.

OUTLOOK

The Company is continuously upgrading its technology and modernizing plant & machinery to maintain competitive edge in the market. Despite tough competition in the market, its sales are growing every year. For some time now, the Company has been concentrating on PU resin where completion is somewhat less. Taking a cue from the "Make in India" campaign of Government of India, the Company explored the opportunities of developing high quality, breathable and import substitution products. The Company has been successful in developing breathable PU resin using high quality resins. These products, which offer higher margins, have been well accepted by market. The Company is also in the process of modifying its production line, which promises better products and significant energy saving. These measures are expected to give some measurable boost to Company's margins.

RISKS AND CONCERNS

Risk is an integral part of any business and Jasch Industries Ltd is no exception. A brief evaluation of business risk of the Company, as perceived by the Management, is as under:-

1. Business Segment Risk

a. User Industry Concentration

PVC/PU Synthetic Leather is used across a wide spectrum of Industries. However Company's products are mostly used in Footwear Industry. Therefore, the fortunes of the company are invariably inter linked with that of Footwear Industry. Any downward trend in Footwear Industry will have significant impact on the company. With vigorous efforts, the Company has been able to increase usage of its products in other Industries such as Automobile & General purpose Upholstery, Sports Goods and Garment Industries and it is hoped that the increasing trend will continue in future also.

Industrial gauges are classified as capital goods. These are generally bought by paper, plastic, steel and galvanizing industry. Revenues and consequent profits from industrial gauges, depend on growth of these industries. In case of a downward trend in the economy, investment in capital goods is the last priority of an enterprise.

b. Customer & Geographical concentration

Excessive exposure to a few large clients has the potential to adversely affect the sales and profitability in view of failure/shift of clients to other manufacturers. Fortunately, the company's customers and dealers are fairly spread out across the country both in respect of Coated Fabrics & Electronic Gauges and further efforts are underway to enlarge presence in southern market.

c. Technological Obsolescence

Right from the beginning, the company has been engaged in its own Research & Development activity with a view to improve upon/modify the process and product to suit Indian tropical conditions and usage practices. Over the years, the company has been able to develop many new products/applications. The Company had entered into technical collaboration agreement with DUKSUNG COMPANY LTD., Korea in September, 2009 for three years. This collaboration had been quite successful in updating technology and development of new products and saving in cost of inputs.

The Company has developed the technology in-house for the design and manufacture of Nucleonic and X-ray Thickness Gauging System which is being further upgraded continuously. Hence, there is no threat of obsolescence in near future, in this segment.

FINANCIAL RISK

(a) Currency Fluctuation Risk

The currency risk emerges from the potential upward or downward fluctuations in foreign currency. The Company's foreign exchange spending including custom duty by way of import of raw materials and consumables currently constitutes about 50% of landed cost of raw material and consumables. The Thickness Gauging System has large

export potential, which provides some cushion by way of natural hedge on foreign exchange transactions. The company incurred foreign currency expenditure of ₹ 3400.86 lakhs during the year (including capital goods of ₹ 163.24 lakhs and foreign travel of ₹ 22.20 lakh, exhibition expenses of ₹ 1.28 lakhs and sales commission of ₹ 16.15 lakhs) against exports in foreign currency were of ₹ 824.14 lakhs, which provides some hedge against adverse fluctuation in foreign currency for the. The company's foreign currency transactions are on current account basis and there are no deferred liabilities in terms of foreign exchange except amount due in respect of raw material imported on deferred payment basis after 31st March, 2015 and to be paid later.

(b) Interest and Leverage Risk

Increase in bank interest rate impacts the profitability of the Company because this increase cannot always be passed on to customer. The management tries to contain interest cost by efficient management of inventory and working capital resources.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

Internal Control Systems

In order to safeguard the assets and their usage, maintenance of proper accounting record and provision of reliable for taking business decisions, the management has put in place various internal control systems. Broadly, these systems are entity level controls, financial controls and operational controls. The internal controls provided by these systems are authority and organization matrix, standard operating procedures, risk management practices, compliance framework within the organization, ethics and fraud risk management, management information system, self-assessment of control point, business continuity and disaster recovery planning, budgeting system, etc.

Adequacy and Key elements of the Internal Control Systems

The Audit Committee of the Company, all of whose Members are Independent Directors, have reviewed the aforesaid internal control systems and found the same to be adequate and commensurate with the nature, size, complexity and the business processes followed by the Company.

The Audit Committee reviews the Internal Audit Reports. Additionally the Audit Committee approves all the audit plans and reports for significant issues raised by the Internal and External Auditors.
